Profile

Dynamic Lead Frontend Developer with 10+ years of experience delivering scalable, high-performance web applications using Angular, React, and TypeScript. Expert in UI architecture, micro frontends, and Agile development, with a proven record of mentoring teams, improving code quality, and delivering exceptional user-focused solutions.

Technical Skills

Frontend: Angular (Material, PrimeNG, NG-ZORRO, NGX-Bootstrap, RxJS, NgRx), React, TypeScript, JavaScript (ES6+), HTML5, CSS3, Single-SPA, D3.js, Chart.js

Backend: Node.js, NestJS, Express, REST APIs, Java (Spring Boot), PostgreSQL, MongoDB, TypeORM

Architecture & Design: Micro Frontends, Monorepo Management (Nx), CI/CD Automation, Modular UI Systems, Design System Integration

Testing & Quality: Jest, Jasmine, Karma, ESLint, Prettier, SonarQube

Tooling & Platforms: Docker, GitHub, GitLab CI/CD, npm, Webpack, Nx

Collaboration & Delivery: Jira, Confluence, Figma

Leadership & Core Strengths: Frontend architecture, scalable component-based design, performance optimization, cross-functional collaboration, team mentoring, Agile delivery, and code quality governance

Professional Experience

Lead Frontend Developer, 1touch.io

Feb 2018 — Present

Data-security startup delivering automated data discovery and privacy intelligence solutions.

- Architected and developed scalable SPAs using **Angular**, **Nx**, and **TypeScript**, improving load times and maintainability across multiple products.
- Designed and implemented a **micro frontend architecture** with **Single-SPA**, streamlining deployment and enabling independent module releases.
- Led a cross-functional **Agile** team of developers through sprint planning, code reviews, and **CI/CD automation** using **Docker** and **GitLab**.
- Partnered with product managers and designers to refine requirements and deliver intuitive, high-performance **user experiences**.
- Mentored junior developers, established **coding standards**, and introduced automated linting and unit testing workflows to boost code quality.
- Built and integrated backend services in **NestJS** to support complex API interactions and improve frontend-backend communication.
- Implemented a demo environment used by sales teams to showcase product capabilities, improving client engagement and accelerating proof-of-concept cycles.

Frontend Developer, Amdocs

Feb 2016 — Jan 2018

Global enterprise software provider specializing in telecom and digital solutions.

- Built and maintained core frontend components for a large-scale enterprise e-commerce platform serving **hundreds of thousands of users**.
- Developed responsive, data-driven interfaces using **HTML**, **CSS**, **JavaScript**, **Knockout.js**, **Backbone.js**, and **jQuery**, while building and integrating **Java-based backend services** to ensure seamless **data flow**, **high reliability**, and consistent **user experience** across large-scale **e-commerce** modules.
- Collaborated with distributed Agile teams to design, implement, and refine new features aligned with evolving business needs.
- Provided **on-site deployment support** and hands-on troubleshooting for production releases, ensuring stability and smooth rollouts.
- Improved UI performance and code maintainability by implementing reusable components and modern frontend best practices.

Web Developer, Wild Solutions

Oct 2014 — Nov 2015

Boutique digital agency focused on custom web and landing-page development.

- Built responsive **landing pages** and small-scale websites using **HTML**, **CSS**, **JavaScript** and **PHP**, ensuring cross-browser compatibility and clean design.
- Collaborated with **designers** to translate mockups into functional, visually consistent interfaces aligned with client requirements.

Education

Bachelor's degree in Computer Science

Sapir College, Oct 2012 — Jun 2015

Military Service

Tank Commander, Armored Corps (IDF) — Sergeant First Class

Served in a **combat leadership role**, commanding and training a tank crew within the Armored Corps. Responsible for operational readiness, mission execution, and crew safety under high-pressure field conditions. Developed strong leadership, teamwork, and problem-solving skills.
